

GLOBAL RISK INTEL

THIRD-PARTY RISK

WHO WE ARE

Global Risk Intel is a boutique risk advisory firm providing consulting services to anticipate, assess, and advise organizations.

WHAT WE DO

Our AI-driven methods ensure that you are always one step ahead of the game. Helping you anticipate, assess, and react to global risks quickly and effectively.

CONCEPT

Leveraging Risk Management, supported by Machine Learning (ML), to assess reliability of third parties.

SOLUTION

Use ML to analyze, evaluate, and mitigate risks presented by companies with whom you do business.

DATA UTILIZED

Company name, management structure, employee turnover, capacity, financial documentation, contracts, and performance metrics.

METHODOLOGY

Using supervised and unsupervised learning methods to analyze and predict results based on structured and unstructured data.

APPLICATION

Companies seeking to gauge reliability of potential partners, contractors, and other third parties.
